# There Are Only 2 Ways People Make Real Money in Crypto

Forget the “hold forever” fairy tales.

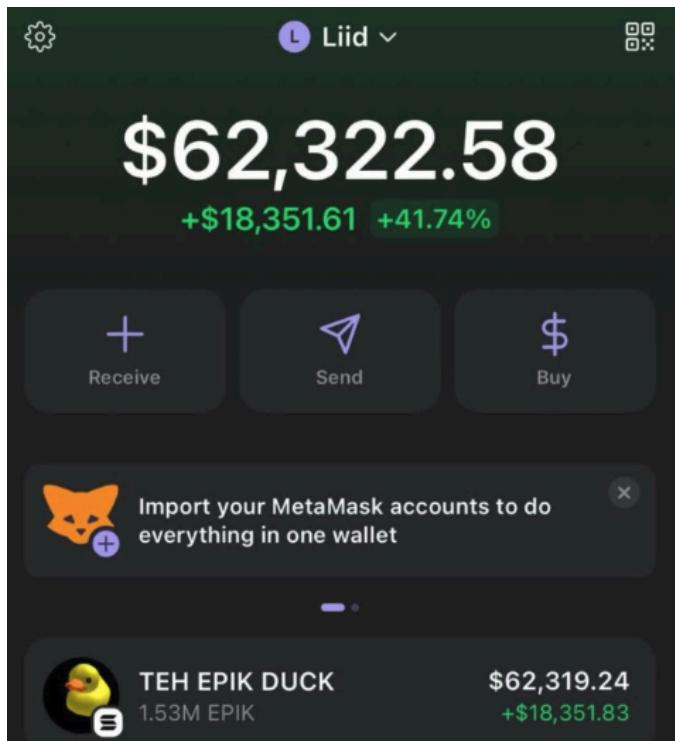

There are only two real games in this market:

## 1 Memecoins

Memecoins are short-term trades driven by **attention and hype**, not technology.

They move fast because many people rush in at the same time.

You make money by being **early**, not by holding long-term.

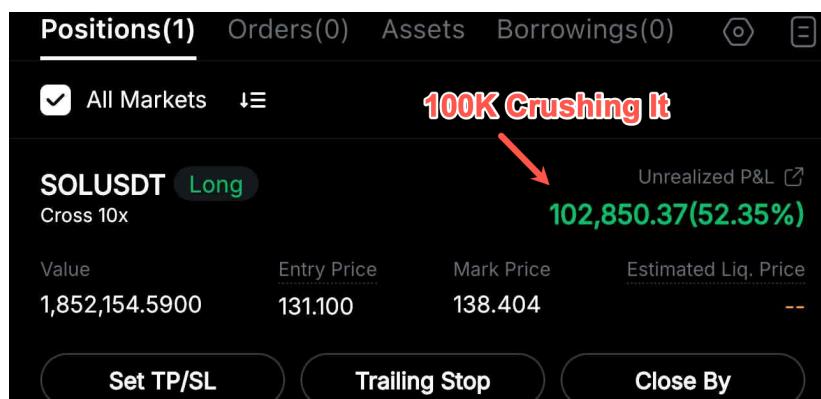

## 2 Leverage Trading

Leverage trading is trading crypto with **extra exposure** using an exchange.

It lets you profit from **small price moves**, both up and down.

Timing matters more than fundamentals.

## What are Memecoins?

Memecoins are high-risk crypto coins that explode in price when attention and hype hit, not because of fundamentals, but because people pile in at the same time.

Memecoins don't move on logic.

They move on **attention**.

And attention always comes *after* smart money already bought.

## The Real Memecoin Cycle

1. Coin launches quietly
2. Smart money accumulates
3. Volume increases, price stays flat
4. Social media starts whispering
5. Influencers & news push it
6. Crowd buys the top
7. Early buyers exit into them

If you're hearing about it everywhere, you're already late.

## How You Actually Find 10x - 100x Winners Early:

There are only 2 things I always use to find winners:

### 1 DexScreener

Market Cap > 500K

Liquidity Locked

Narrative needs to be really good

### 2 Twitter(X)

If you want to be in this game and win you need to be on X most of the time.

Every memecoins starts from X.

Follow crypto influencers and train your feed to show only crypto projects.

**Every memecoin project will rug sooner or later. We are here to make the most amount of money and not marry a memecoin bag.**

## What Is Leverage Trading?

Leverage trading means this:

You trade crypto using a crypto exchange (like Binance, Bybit, etc.).

The exchange lets you use leverage, which means it lets you control a bigger trade with a smaller amount of money.

For example:

- With 10x, a \$100 trade controls \$1,000
- With 100x, a \$100 trade controls \$10,000

You are not actually borrowing money from people.

The exchange simply gives you extra exposure to the market.

## How Money Is Made?

Crypto prices move for one reason:

Money flows in, or money flows out.

That's it.

When a lot of money enters → price moves.

When money leaves → price moves the other way.

Our job as traders is not to guess.

It's to understand where money is flowing.

## Why Most People Lose

Most beginners do this:

- They buy when price already went up

- They sell when price already went down
- They react emotionally

That's not trading.

That's chasing the market.

The market rewards patience,  
and punishes late decisions.

## Why Leverage Is Powerful

Because the trade is bigger, small price moves matter.

A small move up or down in crypto can turn into a meaningful win or loss very fast.

That's why leverage trading can make money quickly.

# ***The Inside Brought To You!***

## **- Memecoin Trading Room – Where Explosive 100x Opportunities Live:**

- Early access to the next big memecoins before the masses even know they exist.
- Learn how to spot hidden opportunities, read social sentiment, and detect subtle on-chain movements that predict explosive moves.
- Full breakdown of each play: Why it could go 10x, 50x, or even 100x—and the exact entry and exit points I use.
- Exclusive Memecoin Alerts: Real-time calls on coins most traders don't even know exist yet.

## **- The Leverage Trading Floor Room**

- Exact Trades I Take: I post all entries, exits, and timing for daily scalps and multi-day swing trades—you just copy.
- Scalping (Daily Trades): Quick in-and-out trades for fast profits.
- Swing Trading (Multi-Day Moves): Trades I hold for days or a week for bigger gains.
- Technical Analysis & Strategy: I teach how to read charts, spot setups, and understand market movements—so you don't just copy, you learn.
- Market Signals & Alerts: I post setups and opportunities most traders miss.

- **ZenChain Beta LIFETIME Access**

- Your Crystal Ball Into The Crypto Block Chain.
